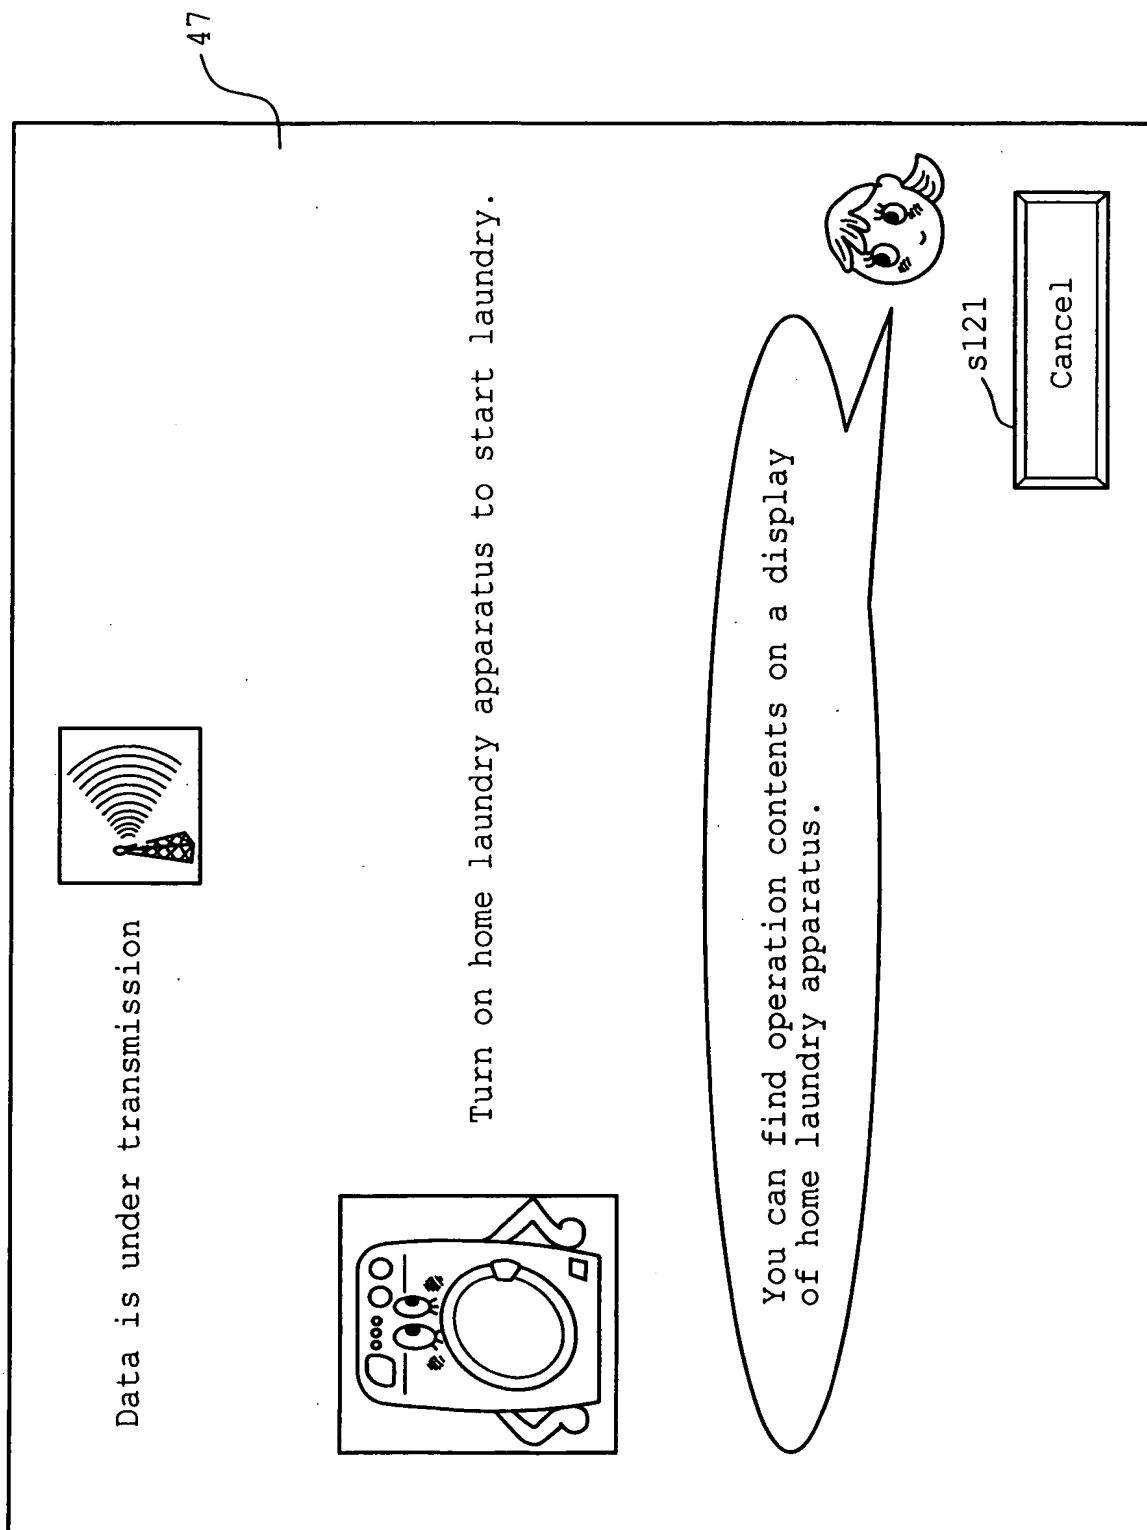

FIG. 12

To those who are allergic (atopic etc.)

■ Why allergy occurs

Washing detergents contain a surface active agent to improve removal of stains etc. from laundry. This component remains in the laundry even after completion of washing when rinsing is insufficient or an excessive amount of detergent is supplied, causing inflammation.

■ Way of preventing allergy

Reduce an amount of detergent when laundry is soiled light. In usual use, a degree of inflammation can be reduced by increasing the number of times of rinsing or an amount of water. Touch the lower switch of "Atopy care" when you desire an increase in the number of times of rinsing. When you use the service for transmission of operation contents suitable for laundry, the number of times of rinsing is automatically increased so that an amount of detergent remaining is reduced.

■ Other links

These are links for detailed information about atopy. Please utilize them.

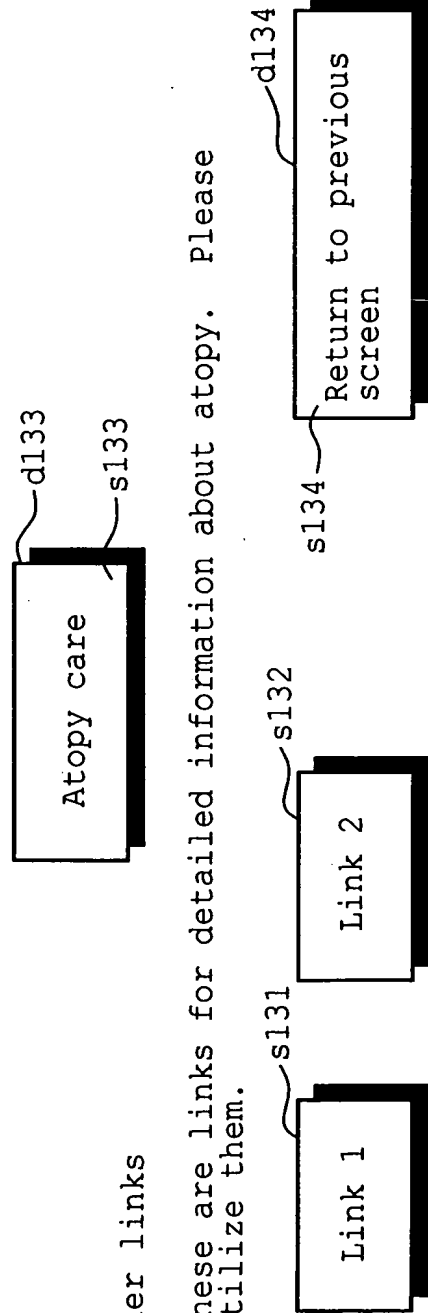

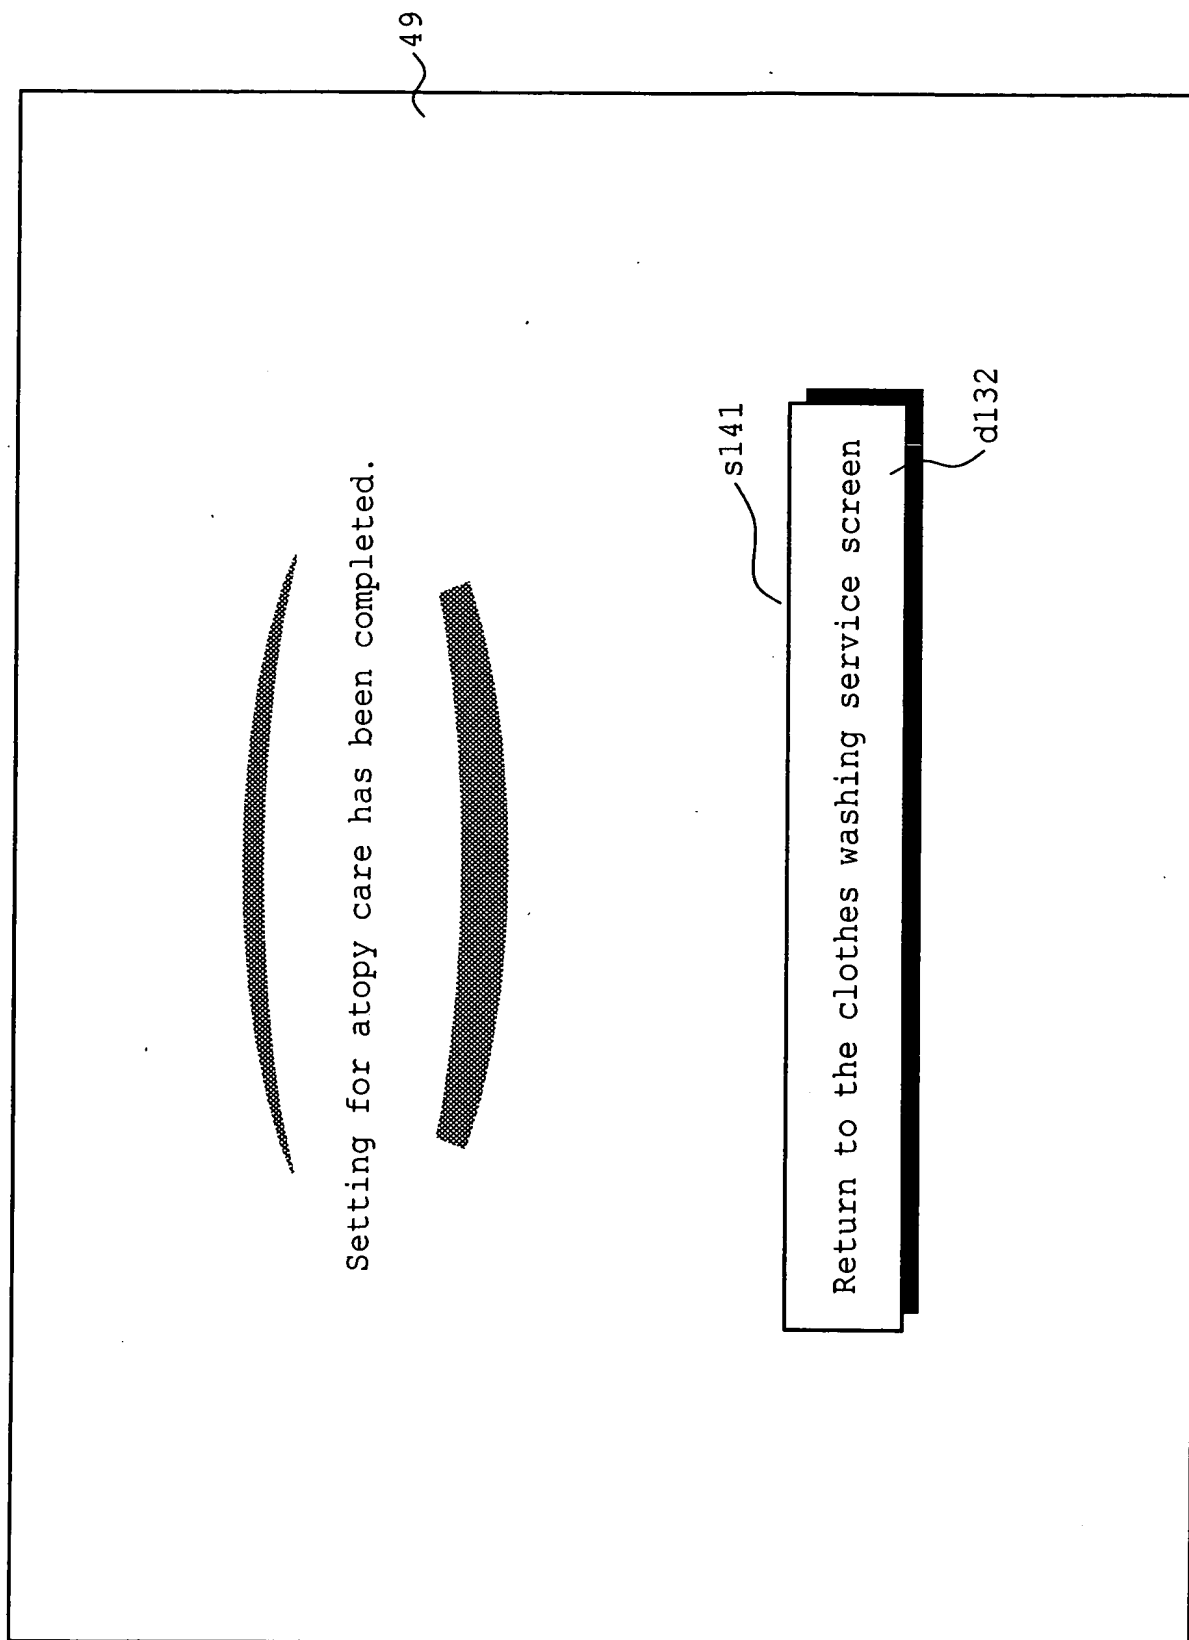

FIG. 13

**FIG. 14**

About used detergent

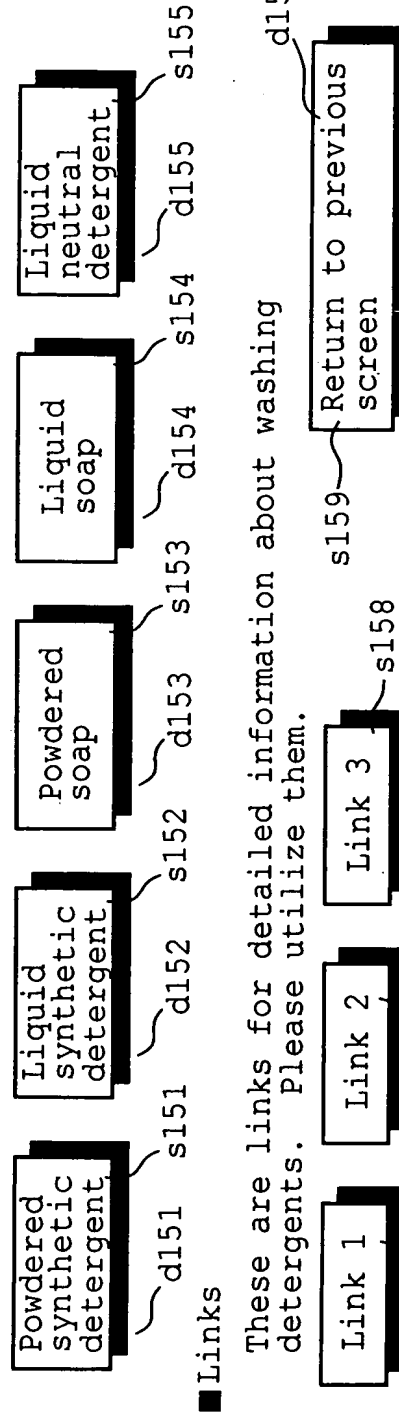

■Types of detergents

There are various types of detergents according to soil. Washing detergents are roughly divided into powdered synthetic detergent, liquid synthetic detergent, powdered soap, liquid soap and liquid neutral detergent.

■Washing detergent which can be used with home laundry apparatus

All the detergents except powdered soap can be used. However, use detergents which are less bubbly. When a detergent is bubbly, a degree of removal of soil and rinsing will sometimes become insufficient.

■To those who desire a washing manner according to the used detergent, operation contents according to the used detergent will be transmitted when you use the service for transmission of operation contents according to the used detergent. Touch the indication of used detergent.

■Links

These are links for detailed information about washing detergents. Please utilize them.

FIG. 15

In use of powdered synthetic detergent

■ Notices of use

Detergent sometimes remains in the detergent case at a house to which a small amount of water is supplied. Further, comply with the indication on a container of detergent when the detergent is supplied. An amount of detergent displayed sometimes differs depending upon a selected course even when an amount of clothes is the same.

Amount of clothes	Displayed amount of detergent (by cup)
About 7 kg	0.9 cups
About 4 kg	0.6 cups
About 2 kg	0.5 cups
About 1 kg	0.3 cups

Touch here when you desire to set.

s161

Operation control is set for powdered synthetic detergent

FIG.16

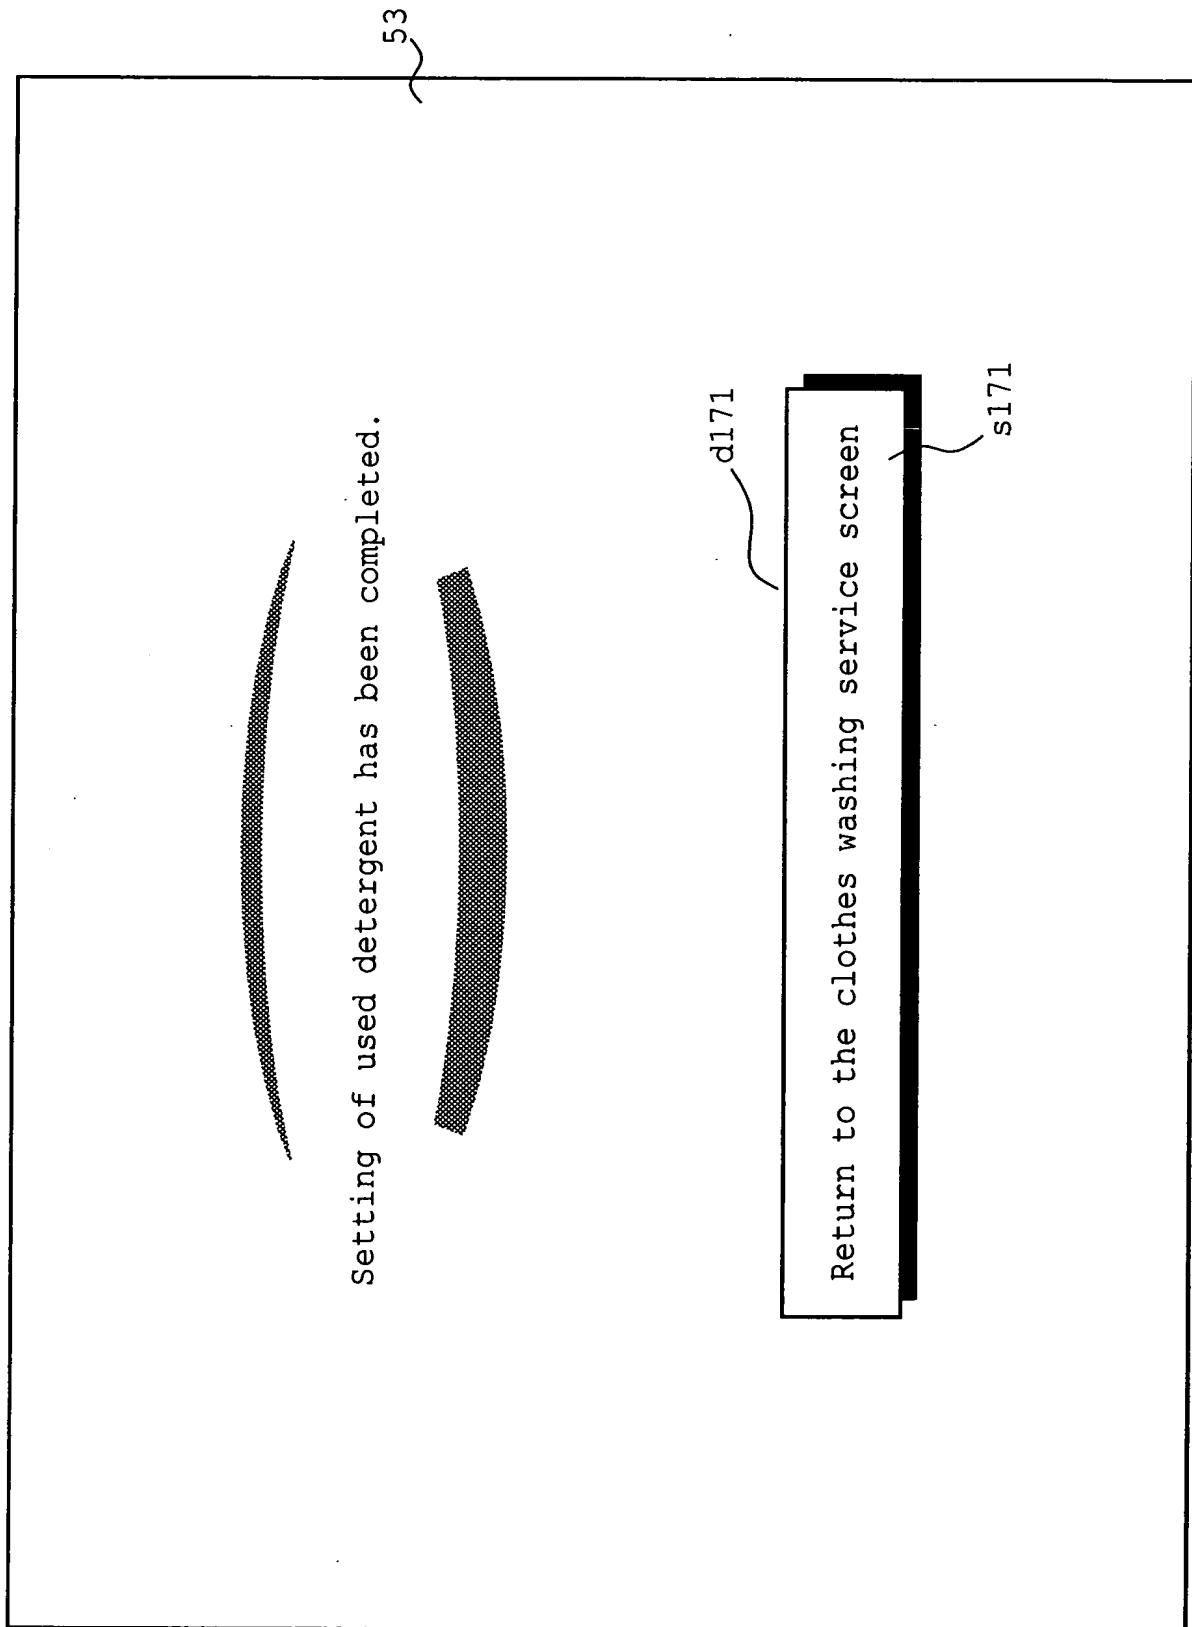

FIG. 17

When noise-reduced operation is desired

■ Clothes which can be set

Optimum operation setting in a noise-reduced course is transmitted when clothes usually washed under standard course, such as ordinary clothes, have been set by the service for transmission of operation contents.

Touch here when you desire to set.

To be operated in noise-reduced course

s181

■ Notice

The noise-reduced course cannot be set when clothes are those for which the noise-reduced course is disallowed to be set. (The noise-reduced course need not be set in a drying course or blanket course since rotational speed for dehydration is low.

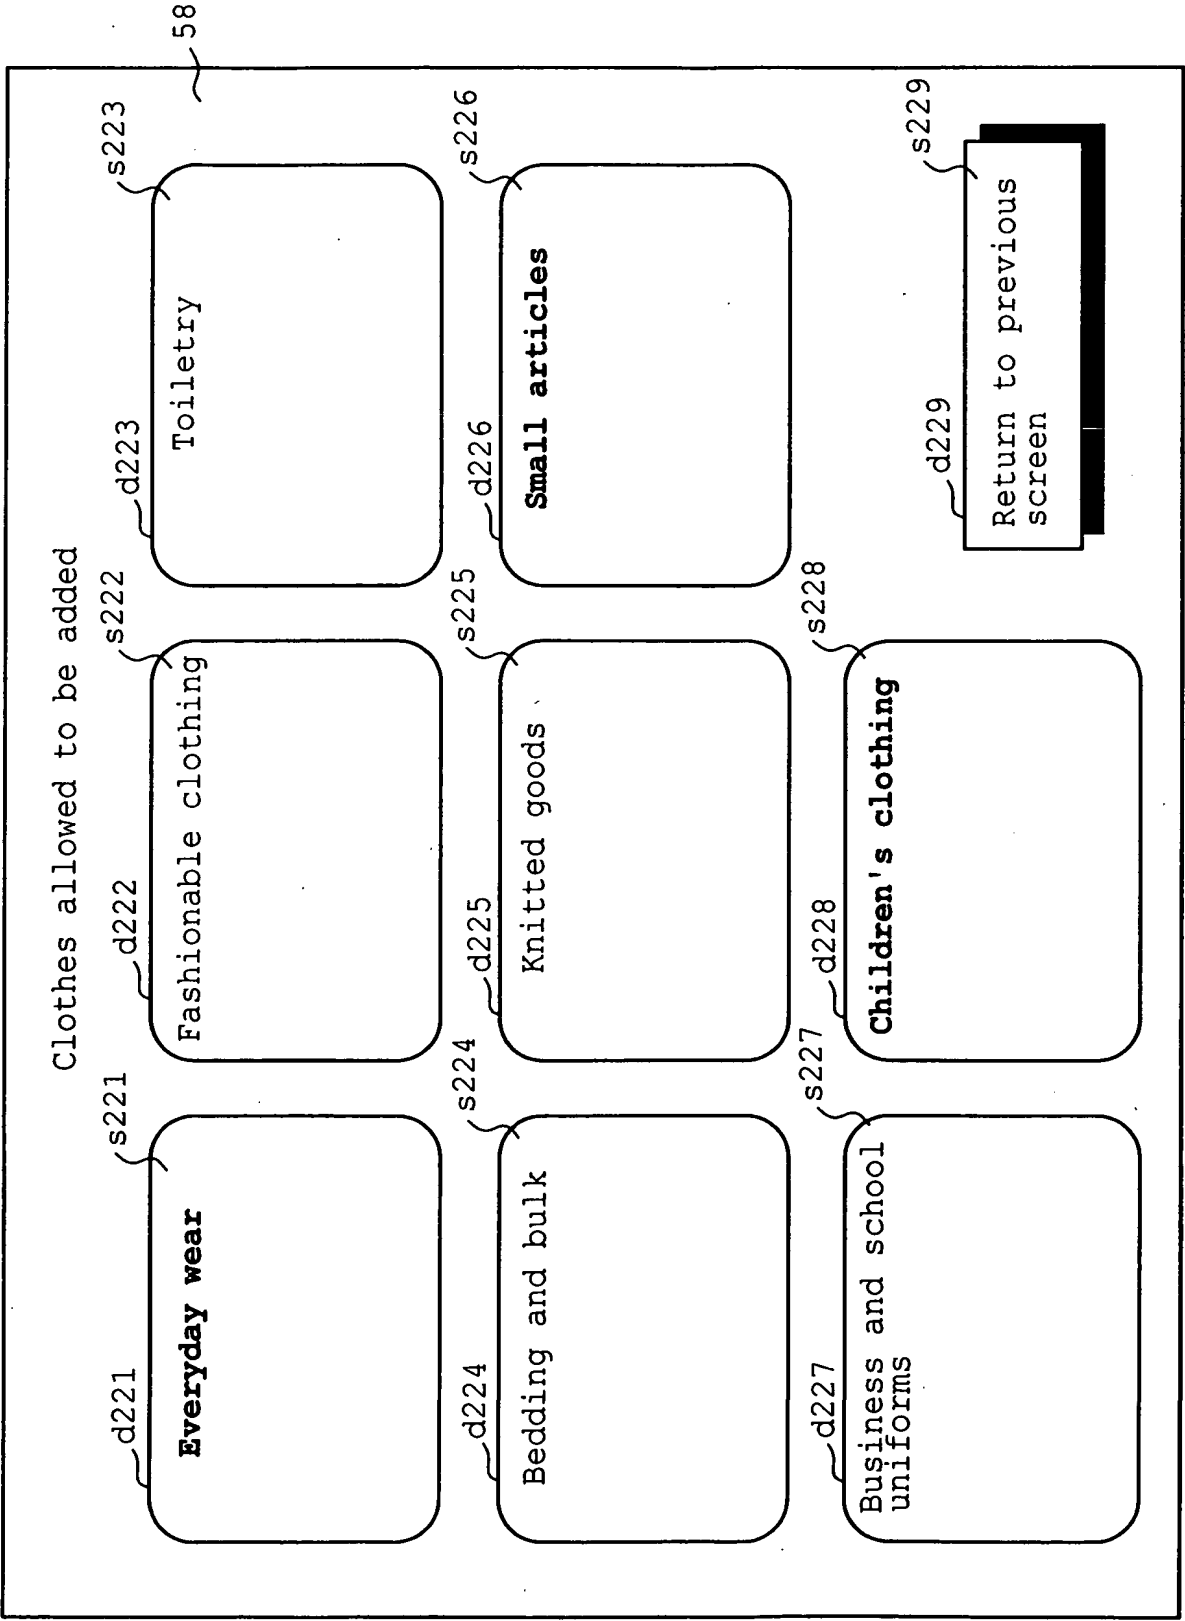

FIG. 22

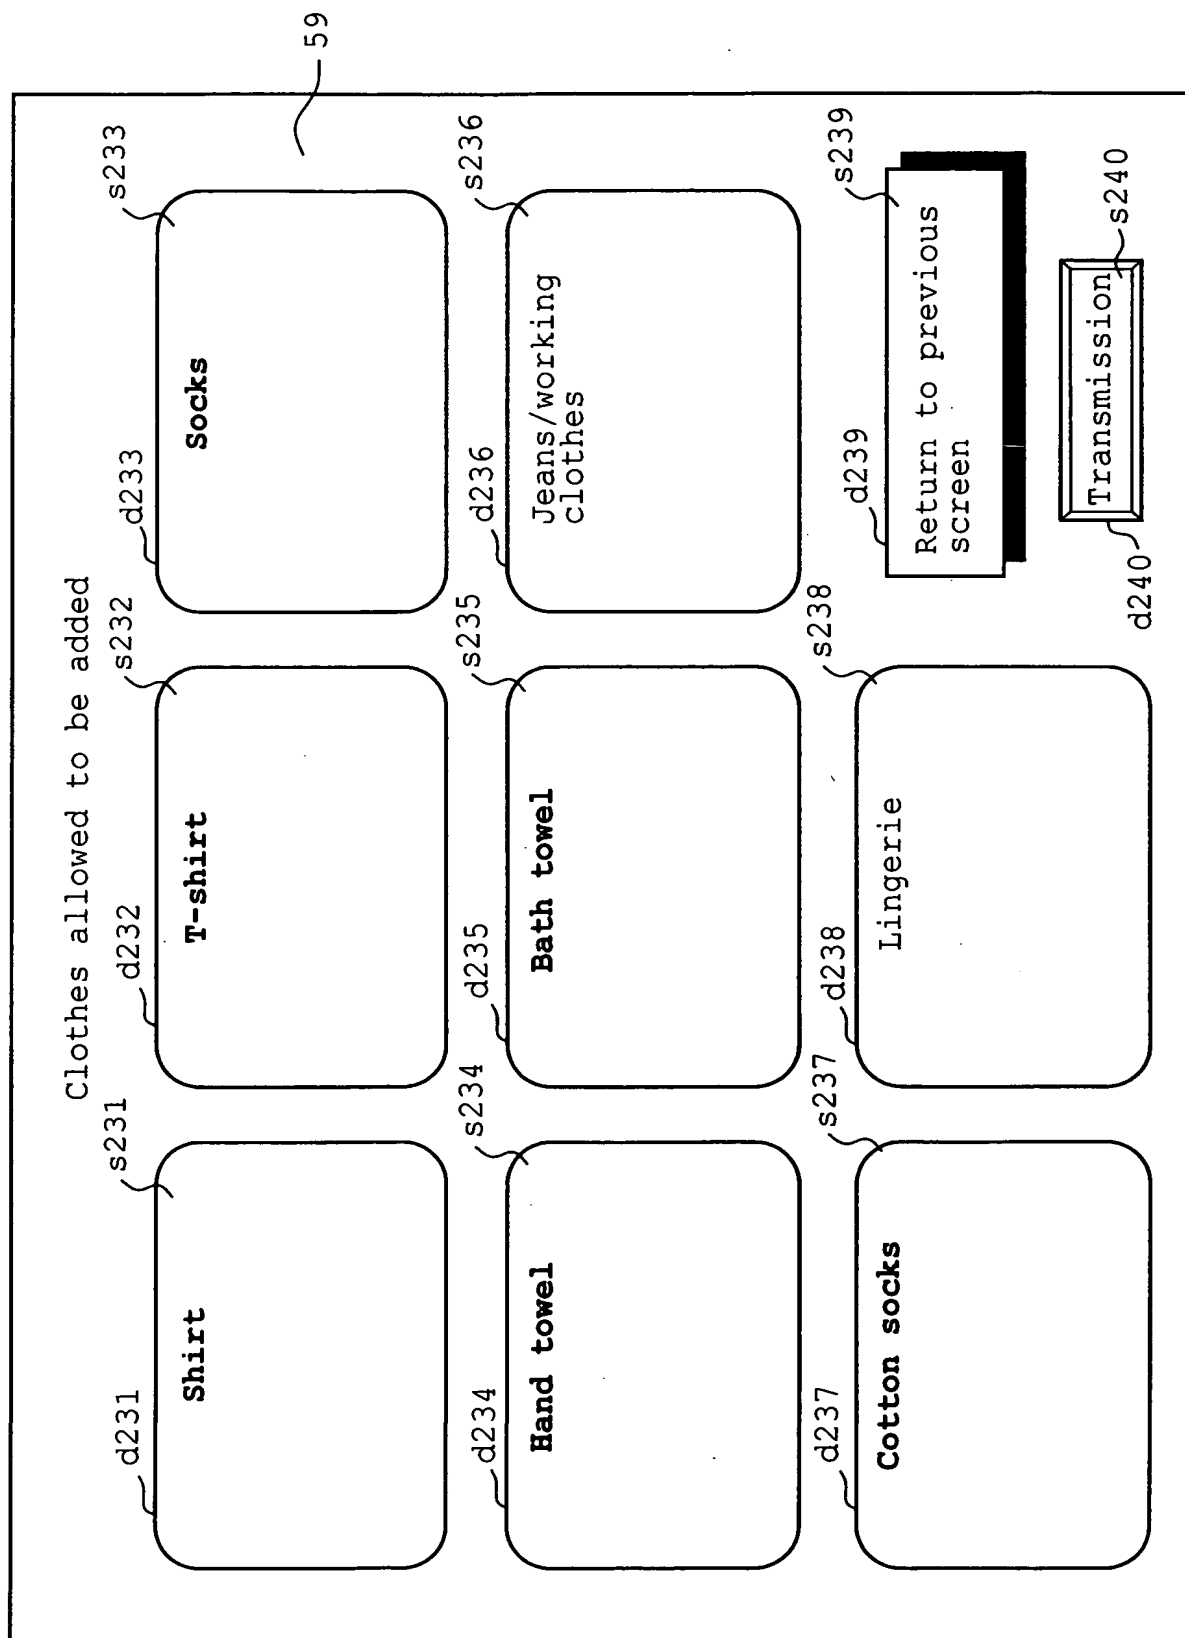

FIG. 23

26/29

60

Control is currently on standby for reservation.

Reserved time and operation contents can be altered.
Do you desire change?

Yes

s241

Remaining time to completion of reserved operation is:

About AM 7:30

d241

Currently set contents:

Washing course	Standard
Contents of drying	Standard, automatic
Steps	Wash to drying
Bathwater	Wash step only
Hot water	Unset
Reservation	After 8 hours

FIG. 24

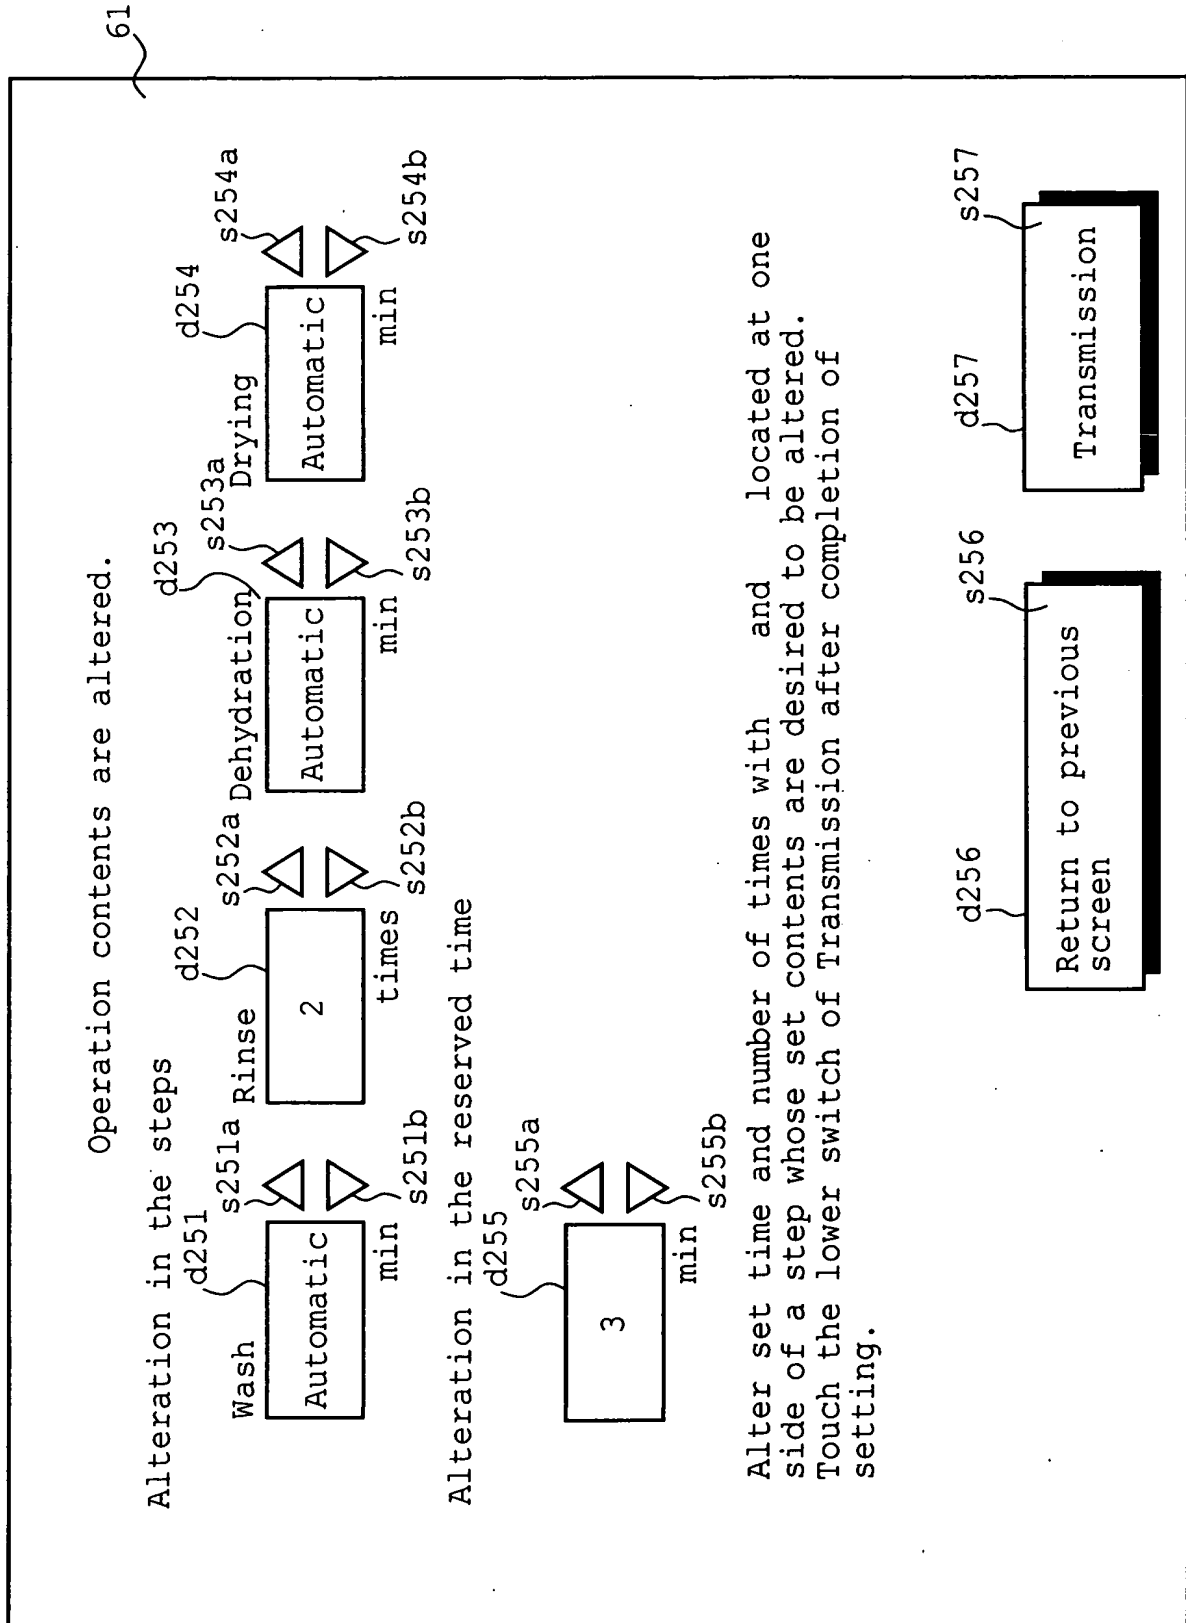

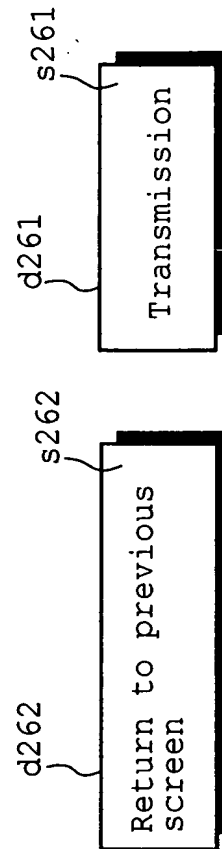

FIG. 25

Operation may not be completed by a finish time since the reserved time is short in the currently set contents. Do you agree to the currently set contents? Touch the transmission switch again when you agree to them. Operation will now start.

Return to the previous screen for re-setting when the contents should be altered.

Under the current set conditions, the shortest reserved finish time occurs after 6 hours.

**FIG. 26**

Caution!

Operation contents have been altered from the contents set by the clothes washing service at the home laundry apparatus side.

Wash time has been changed from 5 min to 8 min. Soft clothes tend to be easily damaged. Put the clothes easy to be damaged into a washing net or wash them separately.
